Virtus Multi 60 Dd

The oven that makes life easier. In style.

Virtus Multi 60 Dd embodies simplicity, precision, minimalist design, and attention to detail. This oven - already a winner at the **2023 Archiproducts Design Awards** in the **Product & Interior Design category** - boasts a sleek, linear, and contemporary design, with total black surfaces that elegantly blend into and enhance any "kitchen space".

The creative design of this oven is based on the desire to put the spotlight on two key elements: the **handle** and the **knob**. The handle, compact but with a solid grip, allows for secure and immediate action. The ample sized knob in the centre looks like a large floating, internally hollow ring with the same lustre as glass, exuding a sense of lightness.

The **Perfect Heat** feature makes cooking even easier and adapts to everyday life. Traditional cooking modes such as *Static, Fan, Grill, and Intensive* become more efficient, making it possible to rapidly increase the **temperature up to 300°C** and precisely control the internal heat. This system ensures uniform cooking results and prevents food from burning or remaining undercooked inside. With Perfect Heat, baking multiple pizzas at the same time is a breeze thanks to the stable internal heat and superior insulation, which prevents heat loss even when you open the door. At last, even beginners can try their hand at preparing more complex dishes with confidence.

Cleaning Virtus Multi 60 Dd is not only simple but also **quick and environmentally-friendly**. With the hydrolytic Eco Clean function, you only need a little water and a few drops of detergent to thoroughly clean the oven cavity, without wasting energy. Our utmost attention on energy consumption reduction is also reflected in its class **A++** rating: a remarkable feat in the oven category.

Robustness and reliability are another asset of Virtus Multi 60 Dd. Special wear-resistant materials perfectly insulate the kitchen unit from periphery heat and extend the life of the appliance, together with the 7-year extended warranty. And what about personal safety in the kitchen? No worries, **Cool**

Door keeps the oven door insulated and cool (to prevent burns and especially handy when children are present). The **Soft Closing** feature guarantees the door closes smoothly and silently.

Elica's Virtus Multi 60 Dd delivers design, energy efficiency, and ergonomics all rolled into one product.
